LFH 7177

Transcription basics

Advanced technology doesn't have to be complicated. The SpeechExec Transcription Set 7177 is a digital transcription system specifically designed to make transcription easy and intuitive. The ergonomic accessories and innovative transcription software let you manage jobs easily and efficiently by displaying all relevant information such as jobs marked as priority and each job's transcription status. SpeechExec Transcription Set 7177 lets you get on with your job.

Manage your workload

- PC transcription software for simple handling of dictations and transcriptions
- Main application window displays a clear job overview of all dictation files and properties
- Finish, suspend or cancel a transcription with the click of a button
- Receive dictation files by Email or from an FTP server
- Ergonomic working with foot control and stereo headphones for efficient transcription

PHILIPS

sense and simplicity

Product highlights

SpeechExec Transcribe

Visual job overview

The visual workflow management and job overview enables you to organize and plan your workload more efficiently. Thanks to visual workflow management, the transcription of priority documents in your preferred order is managed as straightforward as possible.

Access to job information

Relevant data such as length, author name, key words and priority status are accessible throughout the entire transcription process.

Versatile player

Various features such as graphical position indicator, audio volume meter and audible scan function facilitate the transcription process. Speed control, DSS / WAV / WMA / MP3 playback and automatic backspace provide first-class reproduction of your dictations.

Automatic file transfer and updates

Dictation files are transferred automatically using the network.

Worklist / Workflow

Due to the familiar folder view, which is similar to Windows Explorer, the time needed to get accustomed to SpeechExec can be kept to a minimum. A configurable work list enables the user to sort, hide and show columns, etc., while the Job status indicator shows whether a dictation is pending, in progress or finished.

Digital Speech Standard (.dss)

The .dss file format is the international standard for professional speech processing. Offering outstanding audio quality for recorded voice, .dss files allow a high compression rate, reduce file size, network traffic and required storage capacity. The format also allows additional information, such as client/patient name, and document type to be stored in the file header, further facilitating file organization.

Earphones

Lightweight design of earphones

The durable, lightweight quality enhances comfort for extended wearing.

Under chin style

Designed for an under-the-chin fit for better comfort.

3 meter / 10-foot cable

The 3 meter / 10-foot cable gives you the freedom to move around your work area without having to remove your headset.

Foot Control

Ergonomically designed

The new Foot Control was developed in close cooperation with hospital ergonomists and professional end users in order to guarantee a smooth transcription process with minimal physical strain.

Configurable to individual needs

The pedal functions of the Foot Control can easily be adapted to one's personal preferences.
