# AS-7000 Transcription Kit

THE ULTIMATE ADDITION TO YOUR PROFESSIONAL DICTATION SYSTEM

OLYMPUS

The AS-7000 Transcription Kit combines with the DS- 7000 and DS-3500 professional dictation systems – or other Olympus professional digital voice recorders – to provide a complete, end-to-end business solution.

Featuring a redesigned, four-button foot control pedal, headset and next-generation Olympus Dictation Management System (ODMS) software, the AS-7000 is designed to be integrated into the workflow of any office system to significantly streamline data sharing and distribution of dictations between professionals, departments and office locations.

Features:

STREAMLINED WORKFLOW

Special email and FTP functions allow dictation files to be automatically routed to predetermined locations or addresses upon downloading. Dictation files are automatically sorted by sender upon receipt, and document files are automatically entered into the workflow.

ADVANCED ORGANIZATIONAL TOOLS

Created document files are automatically managed in association with dictation files (Windows only).

MULTIPLE FORMAT PLAYBACK

DSS, DSS Pro, WMA, MP3 and WAV/AIFF audio formats can be played in the background when another application – such as word processing software – is running.

FOOTSWITCH CONTROL

A redesigned, ergonomic, four-button footswitch allows for hands-free control of the playback process
