

Rules-based "PC monitor and download" utility for your portable dictation device.

Encrypts and uploads captured dictation or other user-defined files from a remote location to the server without user intervention.

"Set it and forget it" operation. Once configured, Fusion Download runs in the system tray.

Does not restrict users to a particular model; supports several industry standard and 3<sup>rd</sup> party digital portable devices.

*Fusion Voice is an enterprise-wide platform for dictation capture, work flow routing and management reporting.*

# Fusion Download

## *Secure File Transfer Utility*

With the *Fusion Download* utility for Fusion Voice, you can configure offloads and route file transfers for your voice files and transcribed documents. Once configured, this utility is designed to run unobtrusively. Fusion Download automatically encrypts all file transfers for secure transport.

### *Easy to Configure*

*Fusion Download* provides an easy to use Rules Wizard which will allow you to set up where and when your files will be transferred. Individual hand held devices can also be configured with this dynamic utility.

### *Automatic Conversion*

*Fusion Download* can automatically convert many types of hand held recorder file formats straight into PCM for importation to the dictation system. This utility also supports built-in monitoring capabilities for many dictation devices.

### *Secure Transfer*

*Fusion Download* automatically encrypts ALL file transfers so that they may be securely sent over the Internet or Internal Network. Fusion Encryption Manager is used to decrypt these files for use on the destination side of the transfer. FTP and SFTP protocols are supported for file and document transfers to a wide base of installed FTP sites on the Internet.
