Efficiency on the move

SpeechExec for BlackBerry® presents a new dimension to wireless working. Recording, editing and downloading dictation files from your BlackBerry® offers mobile flexibility and reduces document turnaround time. When recording is finished and you are ready to download files, they will be transmitted to your company's dictation server via email, FTP/S or HTTP/S. After transcription, the transcribed document can then be sent back to the BlackBerry® by email. SpeechExec is the perfect companion for your BlackBerry®, delivering everything you need for secure, wireless dictation workflow.

Increased efficiency
• Send your dictation files globally from your BlackBerry® for maximum productivity
• SpeechExec for BlackBerry® offers dictation features such as insert and overwrite modes

Simple to use
• A clear user interface intuitively guides you through the dictation and download process
• Easy-to-use key control for intuitive operation

Central control
• The SpeechExec Mobile server manages secure dictation file delivery
• Secure voice and data transmission maintains a high level of client confidentiality

PHILIPS

sense and simplicity

Product highlights

Increased flexibility
SpeechExec for BlackBerry® turns your BlackBerry® into a wireless digital dictation recorder. Record dictation files at home, in the office, on a plane, or anywhere you need to record and send voice files.

Faster document turnaround time
Make the best use of non-productive time. The ability to send dictation files through wireless transfer decreases turnaround time and dramatically increases personal productivity.

Secure file transfer
In a BlackBerry® Enterprise Server environment, the wireless connection between a BlackBerry® and the server is encrypted for safe file transfer. SpeechExec for BlackBerry® allows additional file encryption. Encrypted files sent through the telecom provider channel and Research In Motion (RIM) channel can be decrypted only when SpeechExec Mobile is running behind a firewall. Furthermore, If a BlackBerry® is lost or stolen, it can be "wiped" remotely to prevent unauthorized access.

Easy to use
An intuitive user interface ensures quick user acceptance. The display shows all recording functions, the current dictation mode as well as the work type, category and comments.

Optimized workflow management
SpeechExec for BlackBerry® creates new possibilities of organizing your firm's document workflow. The ability to send dictation files from anywhere at any time allows you to manage your productive time and work according to your individual rhythm.
